Science Stream

INTERNSHIP EXPERIENCE

2019 | August-December | VOLKSWAGEN Group Japan | Front-End Developer

- **Developed company dealer user interface website**, mainly focus on developing smooth CRUD operations using PHP as the main work scope.
- **Proposed and developed VGJ Chatbot prototype** for employees' daily basis usage with a purpose to reduce the time waste for searching employee details and related documents.
- **Created multiple business flow processes specifically for emergency situations such as earthquake and business shutdown** with reference to IT Security Management ISO27001.
- Leads Design Thinking workshop for the interns in the company, with a purpose to initiate a solution to improve the current problems faced by the company.

2019 | May-August | PETRONAS Carigali Sdn Bhd | Data Analyst

- **Developed multiple data analysis dashboards** using PETRONAS Analytic Toolkit (PETTA) to view each number of wells operated by Petronas.
- PETTA can process and integrate lots of input data formats from various sources including OpenWells software, Integrated Query Management (IQM), SQL Query and Excel.
- **Developed 332 business rules SQL queries** using Microsoft SQL Server for the data migration process in OpenWells software.
- **Learned to create and customize Final Well Report (FWR) format** using SAP Crystal Reports software.

PROJECTS AND RESEARCH

COURSE	PROJECT DESCRIPTION
Final Year Project	Developed mobile app prototype named as AgroGo by using Flutter framework and Figma prototyping tool. The main purpose of AgroGo is to assist the local farmers sell out their agriculture products to home/personal buyers, instead only focusing towards retailers and bulk buyers.
Software Engineering	Required to create a complete website development with a concept same as Trivago website accordingly to certain requirements given such as to select which specifications can be done within the project time frame.
Object-Oriented Programming	Required to create full-function Sales Transaction Processing System by using Java programming language which also to include some object-oriented programming knowledge such as polymorphism and inheritance.

EXTRA-CURRICULAR ACTIVITIES

2020 | INTERNSHIP SHARING SESSION | Speaker

Invited as one of the four speakers for the online talk among UTP students, which to deliver my personal experiences gained during internship period for two different companies. This sharing was organized by Technology, Education and Career (TECUTP).

2020 | UPM SUPER 8 IPT DODGEBALL TOURNAMENT | Team Manager

Assigned as Team Manager by the club manager and leads UTP Dodgeball Team as a Champion, held at Universiti Putra Malaysia (UPM) Serdang on February 2020.

2019 | UTP CAREER TALK | Project Manager

Exposed UTP students to the challenges as an employee in daily working life which covered how to have work-life balance towards productive career. All six invited speakers were UTP Alumni, with more than five years working experiences.

2019 | RECONSA19 | Assistant Project Manager 2

Supervised two departments, Logistic Department and Registration & Accommodation Department, which both departments were vital to ensure the smooth transition of participants moving from one place to another place. RECONSA is a short acronym for Regional Conference on Student Activism with objective to increase students' awareness on volunteerism activities, opens among ASEAN's universities community.

2018 - 2020 | UTP DODGEBALL TEAM | Active Player

UTP Dodgeball Team is a newly founded club in UTP. As the former club captain, I managed to set up an engagement with two dodgeball competitive clubs in Perak, Skills Dodgers and I-Spirit team to held weekly training session.

2018 | CABARAN DEBAT MUDA 2121 | Head of Department Sponsorship

Assisted my committee in approached and secured sponsorships to fund this annual event.
